## PROJECTS

### Loan Application

05/2019 - 08/2019

- Coordinated with development team to create various user groups with unique access to loan accounts through a login system.
- Created controllers that accessed a database through a DAO layer and added relevant data to the model.
- Displayed added data for the users to view loan information through a webpage.
- Used the Scrum Agile methodology for product development with daily meetings, bi-weekly sprints and functionality demos.
- Implemented using Eclipse, Oracle Database, Maven and Git.

### Banking Application

05/2019 - 08/2019

- Created functionality for both customers and employees to manage accounts.
- Programmed a functional XML parser to handle bank to bank account updates.
- Implemented abstract access to the database through a DAO layer.
- Developed using Eclipse, Maven, Spring MVC and PostgreSQL.

### Android Task Reminder

09/2018 - 12/2018

- Coordinated a team as Project Manager to analyze effective implementations.
- Programmed to handle multiple reminder lists and group based on name, type, and repeatability.
- Implemented using Android Studio, Eclipse and SQLite.

## WORK EXPERIENCE

### Quintrix Solutions, Inc.

05/2019 - 08/2019

*Full Stack Java Developer*

- Responsible for expanding client-side and server-side architecture.
- Worked with development team to produce software solutions.
- Designed program code based on defined requirements and prepared documentation of program development.

## EDUCATION

### Queens College, Queens, NY

12/2018

*Bachelor of Arts in Computer Science, GPA (3.197)*

*Minor in Business and Liberal Arts, GPA (3.771)*

### Laguardia Community College, Queens, NY

05/2012

*Associate of Science in Accounting*
